ALEX
CEO

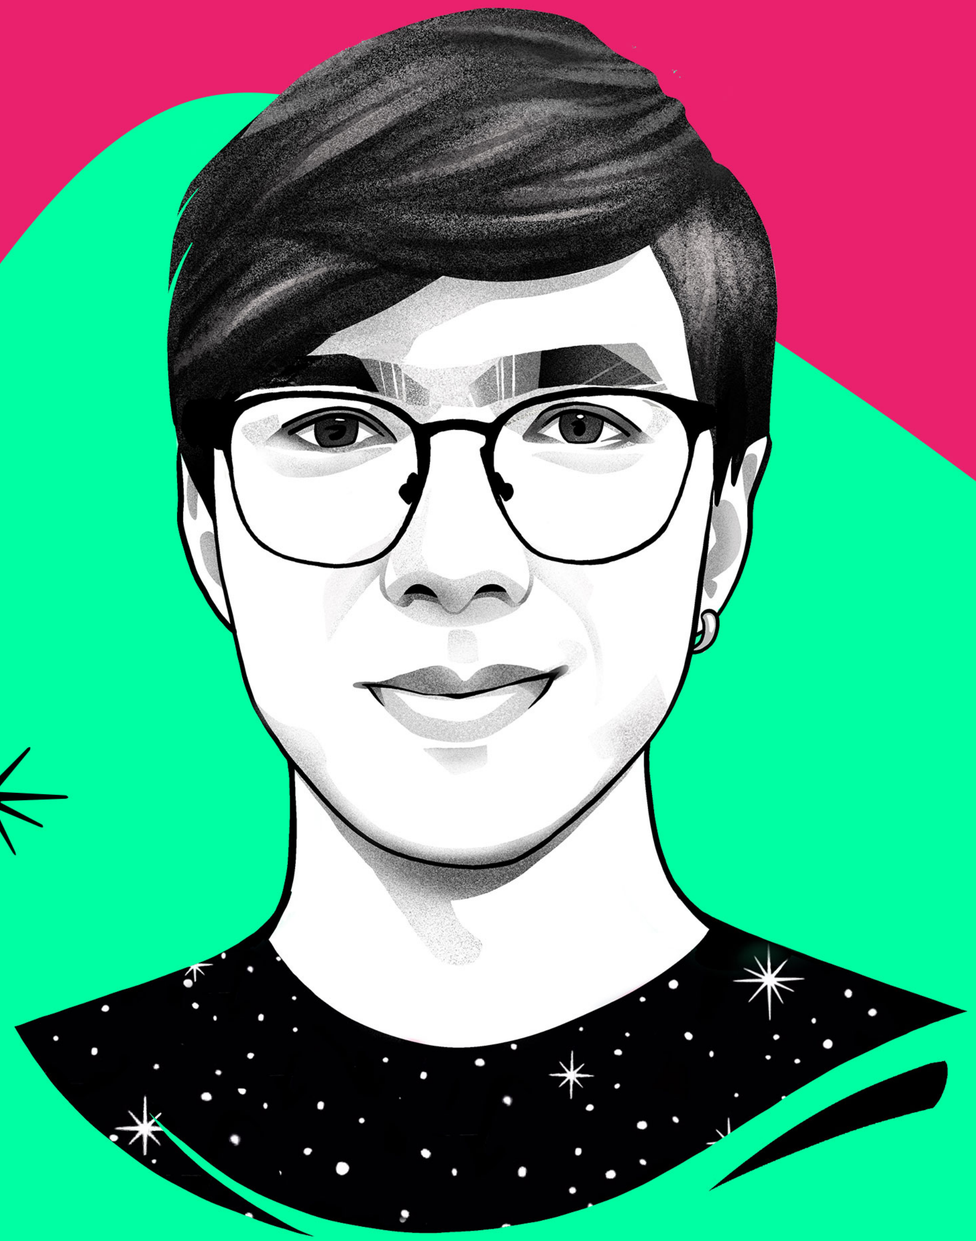
Responsibility and reliability are the key to a successful partnership and the two unbreakable rules of our agency. Our team consists of reliable and qualified professionals. You can count on us.

SEND BRIEF

MITIA CO

Our designers, copywriters and art-directors have worked for global advertising networks and production studios for more than 10 years. High speed and complex projects are things we do the best.

SEND BRIEF



SERGIO CLO

A good result is one that comes with no surprises or trouble. We pay special attention to every detail concerning the legal side of our projects and provide all the necessary documents. We are an LLC which means that we may work with any legal entity.

DELIMOBIL MAIN APP AND WEBSITE

Delimobil is one of the first and major carsharing companies in Russia. Delimobil reached us with a huge and lengthy task: to complete UX- and UI-design and visual representation of the main application, as well as to completely change the consumer's experience and the interaction with the brand and its services. In addition, they requested to produce all their major websites from scratch using seamless SPA technologies and to develop digital advertising materials for B2B and B2C, including numerous landing pages and web materials.

BRAND IDENTITY FOR PECHORIN BAKERY

Pechorin is one of the most prestigious premium bakeries in Moscow, founded by Roman Mamaev, the bass guitarist for the “Neschastny Sluchai” rock band. Our task was a complete rebranding of the chain along with the creation of a new logo and a new brand image, and design of all brand materials from personnel uniform to packaging, as well as the development of the tone of voice guidelines and the creation of a new vivid and visually appealing bakery website. You may see the result below and on your visit to any of the Pechorin bakeries.

PECHORIN WEB SITE

A cool bakery should have a cool website!
What does a cool bakery website look like?
It must be a website where everything looks delicious, where one would want to buy everything and show it to friends. No doubt, you need user-friendly tools to place an order and have delicious treats delivered to your home!

WRAP AGENCY BRANDING

Wrap is a production agency that organizes and carries out commercial shooting for big brands and advertising agencies. The first task was to develop company brand identity from scratch, so that it could emphasize the brightness and simplicity of cooperation, and carry the meaning of the movie slang word **wrap** (the last take of the last scene for that day). The second important task was to develop a cool modern visual language.

WRAP AGENCY WEB SITE

We set a goal to create a beautiful SPA website that would emphasize all the basic ideas of branding and present the work of the agency in the most benefitial way. The first thing that a visitor sees is a colorful powder burst and the logo that is forming within. This explosion is not only a beautiful screensaver, but also an important preloader that loads the website content in the background.

BRANDING AND A WEBSITE FOR PLANTAGO.CAPITAL

Plantago is a company that invests in mobile games and IT-startups. Our task was to invent a company name and to make a visual style so that they could communicate with their target audience in one language and at the same time maintain the image of an international financial organization. We developed an extensive design system in order to accomplish the task.
